

TASKI® Nobile Plus

High gloss crystallizer

Description

TASKI® Nobile Plus a product used for wet crystallization and protection of calcareous stone floors.

Benefits

- Quickly achieves a mirror-like shine thanks to a combined chemical and mechanical action.
- Reduces water and dirt penetrability, thus facilitating daily cleaning and maintenance.
- Increases contour acuity and intensifies the natural appearance of the stone
- Significantly improves slip-resistance

Use Instructions

Dosages /Dilution

- Make the solution with 3 parts of powder and 1 part of water. Slowly add the water to the powder and shake the mixture to a homogeneous paste. Please ensure that the paste is shaken vigorously to ensure smooth dispersion. When the paste has to be applied on the surface, shake the mixture adequately so that the crystals don't settle down and are adequately spread over the floor.

Application

1. If the floor has visible scratches, hone the surface using 400 grit diamond pad for 2 minutes per sq.m and followed by 1800 or 2000 grit diamond pad for 5 minutes per sq.m before subjecting to the crystallization.
2. Use 1% neutral cleaner solution and clean the surface using single disc machine with red pad and then vacuum it. Ensure proper rinsing with water to remove all dirt particles. Prepare paste by taking 3 parts of Nobile Plus and 1 part of water. Use 40 gm paste per m².
3. Damp the floor using wet mopping. Ensure it is just moist and no excess water on floor. It is extremely important to have the floor slightly moist before the application of Nobile Plus.
4. Spread the paste in the center of the application area. Place a 175 RPM single disc machine weighing a minimum of 50 kg, fitted with a red pad, directly on top of the paste.
5. Begin spreading the paste equally over the entire area to be treated.
6. Buff for 3-4 minutes per m². Do not allow the paste to dry. Sprinkle a little water whenever required to maintain a creamy paste.
7. At the end of crystallization, dilute the slurry with fresh water, pick it up with a wet vacuum cleaner. Flood and agitate the section thoroughly with plenty of neutral cleaner solution to ensure complete product rinse-off. Remove the solution with a wet vacuum cleaner.
8. After the floor dries completely, dry buff with a single disc machine, 175 rpm, fitted with a soft white pad.

5 Kg

TASKI[®] Nobile Plus

High gloss crystallizer

Technical Data

Product	pH (10% solution)	Specific gravity(20°C)
Yellow , Solid powder	2.0 – 3.5	0.92-0.96

This figures are typical values and should not be interpreted as specifications.

Item code and available pack size

Product	Pack size	Item code	Shelf life
TASKI [®] Nobile Plus	1 x 5 Kg	5110081	2 years

Remark; Use instruction maybe various base on local regulation. Please follow your local requirement.

Precautions

- For scratched surfaces, grinding is recommended before the crystallization. Use only on calcareous stone floors, e.g. marble, travertine. Protect other surfaces from splashes. Use paste immediately after preparation. Keep container tightly closed.

Safe handling and storage information

- Full guidance on the handling and disposal of this product is provide in a separate safety data sheet.
- Store in original container. Avoid extremes of temperature and humidity.

Safety Reminder

Please make sure your employees read and understand the product label and Safety Data Sheet before using this product. The label contains directions for use, and both the label and SDS contain hazard warnings, precautionary statements and first aid procedures. Improper use or dilution may result in damage to surfaces and may result in health and physical hazards that match those of the concentrate.
