

Vacuum SD 35 B

Powerful, compact industrial vacuum with excellent filtration characteristics

Ideal for bakeries!

The SD 35 B is equipped with a Nomex filter and nozzles for hot temperatures e.g. baking oven up to 200 ° C.

In addition, the SD 35 B can be used wherever performance, mobility and robustness are required. It is thus excellently suitable for the extraction of dusts and solids in numerous industrial branches.

Special advantages:

- 2 x 1150 W bypass motors
- Robust steel construction for extreme requirements
- Large star filter with high filtration separation efficiency and thereby superior suction

The vacuum has a large, mobile collecting container with ergonomic lever lowering.

Recommended applications:

- Bakeries
- Suction of craft machines with automatic switch

Technical data

SD 35 B

Power	2,3 kW
Depression	2500 mm H ₂ O
Airflow max.	360 m ³ / h
Filter surface	2 m ²
Type of main filter	Polyester
Dust class	(L)
Filter occupation	180 m ³ /m ² /h
Dust bin capacity	35 l
Suction inlet diameter	80/50/40 mm
Sound level	76 db
Voltage	230 V
Weight (empty)	35 kg
Dimensions (LxWxH)	500 x 620 x 1250 mm
