

TECHNICAL CONCEPTS

TCell™ 2.0's continuous odour control system is sleek, modern and compact. It's also orientation independent and spill resistant, with the ability to mount to an array of vertical or horizontal surface—walls, ceilings, and even furniture.

TCell™ 2.0 utilises advanced Fuel Cell Technology, delivering a precise, timed dose of high-quality fragrance to enhance a variety of spaces.

Features and Benefits

- Orientation independent with the ability to be mounted to a variety of locations
- Battery-free, passive system
- 100% recyclable*
- Silent, discreet operation
- 30 or 45 day fragrance dispensing option
- Spill-resistant
- Sleek, modern, compact and available in 4 Colour options

*Refills and dispensers are recyclable in category 7

Fuel Cell Technology

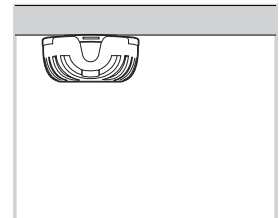

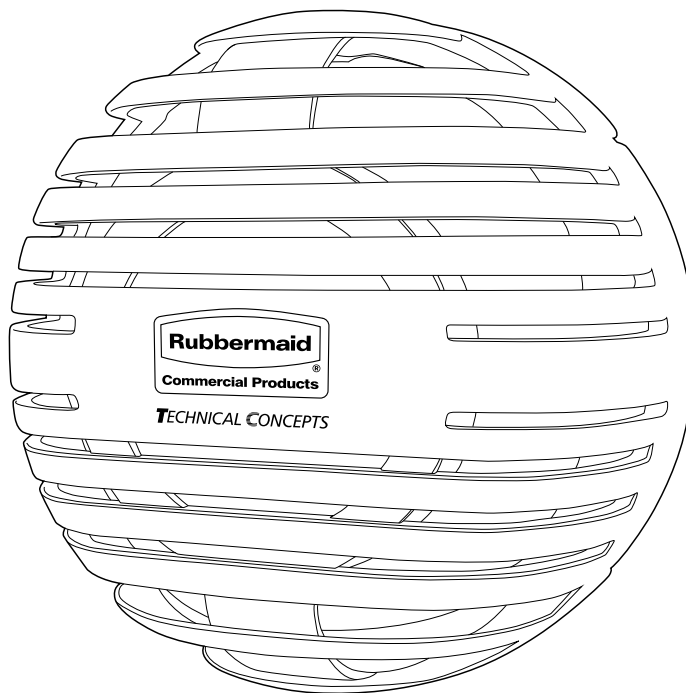

- Natural airflow distributes the fragrance and odour neutraliser throughout the space, covering up to 170m³
- A cost-effective air care solution
- Silent operation
- No propellants
- Battery-free, passive system

Select Fragrances

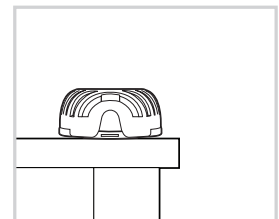

- A variety of clean, fresh fragrances, including high end Elegance, Opulence and Decadence fragrances
- Includes Microtrans™ Technology, an odour neutraliser
- Fragrances last 30 or 45 days, depending upon the selected dispenser setting

Carton Dimensions (cm)	50.06 (L) x 23.85 (W) x 38.13 (H)
Pack Size	6

TCell™ 2.0 Refills-Fragrance Intensity

TOP 10 REASONS TO BUY

1. Creates a clean & fresh environment
2. Consistent level of fragrance throughout 30-45 day refill life
3. Consumer preferred, designer fragrances
4. Decorative, discreet dispensers available in several different Colours to match any décor
5. Silent operation with no moving parts
6. Effective in areas up to 170m³ cubic feet (3-4 stall restrooms)
7. Low cost dispenser acquisition
8. Contains Microtrans® Technology, an odour neutraliser
9. Lifetime Warranty – fully guaranteed against defects in parts and workmanship
10. Battery-free system

FUEL CELL TECHNOLOGY

Without the need for a battery or any harmful materials, TCell™ 2.0 electrochemically creates a power source.

TCell™ 2.0's operation is relatively simple. The refill houses the fragrance, fuel cell and emanator pad. The fuel cell is activated when installed inside the dispenser. Once the headspace inside the refill is full, the ever-increasing hydrogen molecules displace the fragrance, forcing the fragrance out of the cartridge, at a rate of one molecule of fragrance per molecule of hydrogen. The emanator pad absorbs the fragrance oil and distributes a continuous stream of fragrance and odour neutraliser throughout the room, with the assistance of natural airflow.

IDEAL ENVIRONMENTS

Works well in all washrooms, but especially recommended for use in:

- Foodservice
- Hospitality
- Property Management
- Healthcare

Other suggested environments:

- Higher Education
- Schools
- Manufacturing
- Entertainment Venues
- Retail and Service Transportation
